COMMUNITY LAND MANAGEMENT PLAN

2. Reserves

RESERVES

Council manages a range of community land parcels that are categorised according to their primary function. Most of this land is classified as Reserves. Reserves are further subcategorised into specific types, each with a defined purpose and role within the community, based on their predominant use, while recognising that some reserves may support multiple compatible functions.

These subcategories provide a consistent framework for planning, management, and decision-making, and help ensure each reserve is managed in a way that aligns with its intended function and delivers community benefit.

The reserve subcategories are described below.

- **Premier Regional** - Large outdoor areas with strong visitor appeal, supported by amenities such as playgrounds, trails, signage and other recreational infrastructure.
- **Developed Reserves** - Sites intentionally modified or enhanced for community use, supporting both active and passive recreation. These areas often include facilities such as neighbourhood playgrounds, seating, paths, and landscaped features integrated with natural elements.
- **Stormwater Management** - Areas designed to manage stormwater flow and reduce flood risk, generally requiring minimal landscaping and maintenance.
- **Walkways** - Pedestrian routes set within landscaped or natural areas, providing opportunities for both formal and informal use.
- **Landscape Buffers** (including tree screens and road reserves) – Vegetated zones that act as visual and acoustic buffers between properties, roadways, or transport corridors.
- **Linear Open Space and Corridors** - Long, connected stretches of green space that often follow natural features such as rivers or waterways, characterised by low-maintenance landscaping and opportunities for passive recreation and environmental connection.

Purpose for which the Land is Held

Reserves are held to provide accessible open space for the community, offering places for recreation, connection with nature, and outdoor activity and may include periodic business use. They support a range of functions that enable members of the public to play, socialise, exercise, relax, and participate in community or civic activities, in a manner appropriate to the location and purpose of each reserve.

In fulfilling these roles, reserves accommodate a range of compatible uses and functions that reflect their location, design and community needs. These may include supporting active and passive recreation through playgrounds, leisure spaces, walking and cycling paths, and picnic facilities; contributing to environmental outcomes by protecting and enhancing river corridors, waterways, native vegetation, tree canopy, and wildlife habitats; and performing practical roles such as providing pedestrian connections and cycling connections, visual and landscape buffering, and land for drainage, stormwater management, and essential utility infrastructure where compatible with community use.

Description of the Land

Within this plan, Appendix B will include the following details for each parcel of community land:

- Name of Land
- Certificate of Title
- Lot number and street address
- Dual Community Land Management Plan (where applicable)
- Trust or Dedication granting Town of Gawler as Custodians

There may be occasions where a land parcel has been assigned multiple community land categories. In these instances, the land parcel will appear in multiple plans. The table contained within this plan will indicate where there are dual categories for parcels.

Management Proposals for the Land

Council will manage the development, use and maintenance of reserves in accordance with legislative requirements and Council's Strategic Framework provided in the Community Land Management Plan Overview document. The following proposals are not listed in any order of priority or hierarchy:

- To provide safe, accessible, and attractive open spaces that support community use, enjoyment, and a range of passive and active recreation opportunities.
- To plan, deliver, maintain and upgrade public facilities, infrastructure, and landscapes in a sustainable and efficient manner, consistent with Council budgets and asset management plans.
- To protect and enhance natural environments and landscape values, including waterways, drainage corridors, native vegetation, tree canopy, and wildlife habitat, in a manner appropriate to each reserve's function.
- To manage stormwater and natural water flows to minimise flood risk, support environmental outcomes, and contribute to amenity and usable open space where compatible with community use and the purpose of the land.
- To support pedestrian and cycling movement and connectivity, including through walkways, shared paths, and linear corridors.
- To facilitate the use of reserves for essential utilities, drainage, and service infrastructure where compatible with community use and the purpose of the land.
- To preserve the natural character of the North and South Para Rivers and Gawler River areas, acknowledging and honouring the Kaurna people's unique connection to these lands.
- To manage leases, licences, and permits over reserves to ensure that uses are consistent with this plan, deliver clear community benefit, and do not compromise public access, safety, environmental values, or the ongoing function of the land.

The following objectives, performance targets and measures support the management proposals outlined above and provide a framework for monitoring and reviewing how reserves are managed over time.

Leasing, Licensing and Permits

In relation to reserves, lease, licence, or permit agreements may be granted where they are consistent with management proposals of this plan. For Crown land, agreements must also align with the land's dedicated purpose, where required.

The terms and conditions of any lease, licence, or permit will ensure that:

- Land and facilities are maintained to a safe, accessible, and visually appropriate standard.
- Public benefit and community access are appropriately considered.
- The rights and obligations of Council, lessees, licensees, and the community are clearly defined.

Current leases and licences under this plan are detailed in the Community Land Register, available on Council's website.

Objectives, Targets and Measures

Council is required to articulate its vision for the land through defined objectives and performance targets, along with measures to assess progress against them.

Appendix A outlines the objectives, performance targets, and measures for Council reserves. These are presented without any order of priority or hierarchy.

Appendix A: Reserves – Objectives, Performance Targets and Measures in Managing Community Land

Category	Objective	Performance Targets	Performance Measures
Premier Regional	To provide high-quality, regionally significant open spaces that support a broad range of recreational, community, and visitor experiences.	Premier regional reserves are safe, accessible, and maintained to a standard appropriate to their scale, level of use, and visitor appeal.	Inspections, maintenance, and upgrades undertaken in accordance with Council's approved plans, annual works program and service standards.
Developed Reserves	To provide parks, reserves, and amenities that are safe, accessible, and well maintained for community use.	Parks and reserves are maintained to a standard appropriate to their classification and level of use.	Inspections, maintenance and upgrades carried out in line with Council's approved plans, annual works program and service standards.
Stormwater Reserves	To provide and maintain stormwater infrastructure that supports flood mitigation, environmental outcomes, and service delivery.	Council-owned stormwater assets are safe, functional, and appropriately maintained.	Planned inspections, maintenance, and renewals undertaken in accordance with asset management plans, annual works programs, and service standards.
Walkways	To provide safe and accessible pedestrian connections for public use.	Walkways are maintained in a condition that supports safe public access.	Inspections and maintenance carried out in accordance with Council's annual works program and service standards.
Landscape Buffers	To maintain buffer reserves that are fit for purpose and contribute to safety and local amenity.	Buffer reserves are maintained to support their intended screening, access, and amenity functions.	Inspections and maintenance undertaken in line with Council's annual works program and service standards.
Linear Open Space and Corridors	To provide safe, functional linear open spaces that support movement, amenity, and environmental values.	Linear open space and corridors are fit for purpose, safe, and appropriately maintained.	Inspections and maintenance undertaken in accordance with Council's annual works program and service standards.
	To protect and enhance the natural character of river corridors and watercourses.	River corridors and watercourses are managed in accordance with legislative requirements and Council plans and strategies.	Maintenance and management activities delivered in accordance with approved plans, service standards, and annual works programs.
Leases, licenses and permits	To ensure leases, licences, and permits over reserves are managed in a consistent, equitable, and compliant manner.	Leased, licensed, and permitted areas are used in accordance with the terms and conditions of the relevant agreement.	Monitoring and compliance checks undertaken to confirm adherence to agreement conditions.

Appendix A: Reserves – Objectives, Performance Targets and Measures in Managing Community Land

Category	Objective	Performance Targets	Performance Measures
Customer requests	To respond to customer requests relating to reserve maintenance in a timely and practical manner.	Customer requests are investigated and actioned where practicable.	Review of response times and actions taken against Council's customer service standards.
Continuous improvement and strategic alignment	To ensure reserve management practices remain effective, consistent with Council's strategic direction, and responsive to community needs.	Management practices are periodically reviewed and updated to reflect changes in Council priorities, service standards, and community expectations.	Quadrennial review of Community Land Management Plan objectives and performance targets. Periodic engagement with stakeholders, user groups, and the community to inform future planning and improvements.
